Education

Vishwakarma University **CGPA: 8.09**

2023 – 2027

Bachelor of Technology (BTech) in Artificial Intelligence and Machine Learning

Experience

Technical Manager Intern

1 Month

Skyflo

- Triaged and prioritized GitHub issues across the open source codebase, coordinating contributor workflows and ensuring PRs met quality standards before escalation to the founder.
- Conducted structured ecosystem analysis across Kubernetes, DevOps, and AI Agent domains, translating engineer pain points into actionable technical positioning insights.
- Drove documentation strategy by producing architecture diagrams and improving README clarity, reducing contributor onboarding friction.
- Collaborated directly with the founder on sprint priorities and product roadmap decisions, bridging technical execution with strategic direction.

Projects

TravelEval: Auditing Reliability, Bias & Trust in Tourism LLMs | *LLM Evaluation, NLP, Statistics*

- Built an end-to-end evaluation framework to measure hallucinations, bias, and real-time accuracy across LLMs, analyzing **200–300+ queries** with evidence-backed validation.
- Designed **bias detection pipeline** for destination recommendations, improving visibility into geographic skew and diversity gaps by quantifying exposure across regions.
- Conducted **user trust study** with 80–150 participants, generating statistically significant insights (t-tests/ANOVA) on transparency and decision confidence in AI travel assistants.

AI Voice Agent & Mobile App for Insurance Collections | *Twilio, Dialogflow, Google Cloud STT/TTS*

- Built automated voice bot using **Twilio** and **Dialogflow**, reducing manual follow-ups by **40%+**.
- Enabled real-time intent detection & interruption handling with **Google Cloud STT/TTS**, improving engagement by **30%**.
- Developed mobile app for tracking, escalation, and fraud flagging, boosting collection efficiency by **25%**.

RAG-Based Document Q&A System | *Python, LangChain, FAISS, Gemini, Streamlit*

- Built a **Retrieval-Augmented Generation (RAG)** pipeline enabling semantic search and question answering over large document corpora using **LangChain** and **FAISS** vector store.
- Integrated **Gemini** as the generative backbone with custom prompt templates, achieving **85%+ answer relevance** on domain-specific queries.
- Deployed an interactive **Streamlit** web interface for real-time document ingestion, chunking, embedding, and query resolution.

Arduino Based Obstacle Avoiding Robot | *Arduino, GPS, Embedded Systems*

2023

- Built an Arduino-based obstacle avoiding robot with crash detection and GPS system, winning **1st Prize** at the Capstone Project showcase.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL, C

Web & Backend: React, Next.js, Node.js, FastAPI, NestJS, Flask, Express, Tailwind CSS

AI/ML: PyTorch, LLM, LangChain, LangGraph, LlamaIndex, Transformers, vLLM, PEFT (LoRA), Natural Language Processing (NLP), Deep Learning (DL), Data Science, Generative AI, Pytorch MLflow, Data Analytics

Databases: PostgreSQL, MongoDB, Redis, Pinecone, Neo4j, PowerBI

DevOps & Tools: Kubernetes, Docker, Git, Linux

Publications

Multidisciplinary Emerging Trends in Engineering and Technology

August 1, 2024

ICMETET 2024 – International Conference on Multidisciplinary Emerging Trends in Engineering and Technology

ISBM College of Engineering, Pune | Hybrid Mode (Online + Offline)

e-ISBN: 978-81-970159-5-3 | **DOI:** 10.17492/jpi.ISBM.082401

Editors: Dr. Pankaj Kumar Srivastava, Dr. M. P. Yadav, Dr. Vilas R. Joshi

Achievements & Certifications

1st Prize at Arduino Based Obstacle Avoiding Robot with Crash Detection and GPS – Capstone Project (2023).
Google – Generative AI Study Jams (2025).
Deloitte Australia – Cyber, Data Analytics & Technology Job Simulations (Forage, 2025).
HackerRank – Python, SQL & Problem Solving Certifications (2025).
Coursera – .NET, C# & Introduction to Software Engineering (2025).
